Answer key

Year 2 maths: Making amounts with coins (Easy) · Sheet 515265

1. A — 20c; C — 5c; F — 10c

5c, 10c and 20c are each worth less than 50c. 50c is not less than 50c: it is the same. $1 and $2 are worth more than 50c, even though they are small coins.

2. the 10c coin

The 10c coin is worth the least: 10 cents. The $1 coin is worth 100 cents.

3. 45c

Biggest first: 20c, 40c, 45c. Olivia has 45c.

4. 70c

Any coins that make 70c are right. One way: 50c and 20c.

5. A

20c and 10c make 30c. 20c and 5c make only 25c. Two 5c coins make 10c.

6. B — 50c; C — $2; F — $1

50c, $1 and $2 are each worth more than 20c. 20c is the same as 20c, not more. 5c and 10c are worth less.

7. A — $1; D — $2

$1 (100 cents) and $2 (200 cents) are worth more than 50c. 50c is the same as 50c, so it is not more. 20c, 10c and 5c are worth less.

8. A — $2; B — $1

$2 and $1 make $3. $2 and 50c make only $2.50, and 50c and 20c make 70c.

9. D — $2.20

$2 and 20c is two dollars and twenty cents: $2.20. $22 would be twenty-two dollars.

10. A — $1.50; C — $1

$1.50 and $1 make $2.50: $1 + $1 = $2, then 50c more.
