Year 3 maths: Litres and millilitres (Easy)

Maths · Measurement
Level: Easy

Student: _____ Date: _____

Instructions
- There are 10 questions. Read each one carefully.
- Write your answers on this paper. Use the space under a question to work it out.
- A grown-up can read a question aloud — that's fine.
- The answers are at the end. Check them together when you have finished.

Questions

1. Which holds more: a 1 L bottle or a 700 mL bottle?

Circle one answer.

○ **A** the 700 mL bottle ○ **B** the 1 L bottle

2. How many millilitres are in three quarters of a litre? Answer: ____ mL

Working:

3. 4000 mL is how many litres? Answer: ____ L

Working:

4. A 1 L carton of milk is opened. 300 mL is used for pancakes. How much milk is left? Answer: ____ mL

Working:

5. Lachlan pours 250 mL of water into a bucket and then 250 mL more. How many millilitres is that?

Answer: ____ mL

Working:

6. 1 L of water is shared equally between 2 bottles. How many millilitres go in each bottle?

Answer: ____ mL

Working:

7. Which amount is the same as 1 litre?

Circle one answer.

○ **A** 100 mL ○ **B** 1000 mL ○ **C** 10 mL

8. A cup has 50 mL of water. Sam pours in 100 mL more. How much water is in the cup now?

Circle one answer.

○ **A** 100 mL ○ **B** 50 mL ○ **C** 150 mL

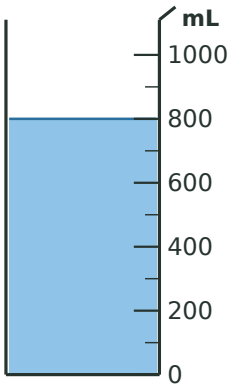

9. It takes 6 cups to fill a jug. Each cup takes half a minute to fill and pour. How long does it take to fill the jug?

Circle one answer.

○ **A** 6 minutes ○ **B** 12 minutes ○ **C** 3 minutes

10. Max pours out one-quarter of the water in this jug. How much is left?

Circle one answer.

○ **A** 200 mL ○ **B** 400 mL ○ **C** 600 mL

Answer key

Year 3 maths: Litres and millilitres (Easy) · Sheet 921761

1. B — the 1 L bottle
1 L is 1000 mL, and 1000 mL is more than 700 mL.

2. 750 mL
A quarter of a litre is 250 mL. Three quarters is 250 + 250 + 250 = 750 mL.

3. 4 L
Every 1000 mL is 1 litre. 4000 mL is 4 L.

4. 700 mL
1000 − 300 = 700 mL.

5. 500 mL
250 + 250 = 500 mL.

6. 500 mL
1000 mL shared by 2 is 500 mL each.

7. B — 1000 mL
1 litre is 1000 millilitres.

8. C — 150 mL
50 + 100 = 150 mL.

9. C — 3 minutes
Two cups take 1 minute. 6 cups is 3 lots of 2: 3 minutes.

10. C — 600 mL
The jug shows 800 mL. One-quarter of 800 is 200. 800 − 200 = 600 mL is left.
